

## EDDHA-Fe 6%

### DESCRIPTION

|                     |           |                                                             |
|---------------------|-----------|-------------------------------------------------------------|
| General Description |           | Origin                                                      |
| Sodium Ferric Eddha |           | China                                                       |
| Grade               | E number  | Formula                                                     |
| Fertilizer Grade    | -         | $\text{C}_{18}\text{H}_{16}\text{N}_2\text{O}_6\text{FeNa}$ |
| Molecular weight    | EINECS    | CAS number                                                  |
| 435.164             | 240-505-5 | 16455-61-1                                                  |

### PRODUCT CHARACTERISTICS

| Physicochemical properties          | Unit | Standard                                         |
|-------------------------------------|------|--------------------------------------------------|
| Fe                                  | %    | ≥ 6.0                                            |
| pH                                  | -    | 7.0-9.0                                          |
| (ortho-ortho) effective chelated Fe | -    | 2.0/3.0/3.6/4.2/4.8                              |
| Appearance                          | -    | Reddish-brown or black-brown granules or powders |

*Further specifications are available upon request*
